Guys -

As a former litigator I am appalled at the way you division gave away your hard won court victories for that flimsy, hole ridden, useless settlement document by which Microsoft rolled all over the United States.

You completely wasted my tax dollars by capitulating in the midst of victory over one of the most vicious monopolies since the Standard Oil Trust. You are handing the internet over to Microsoft, destroying innovation (MS is incapable of inventing they just immitate and then extinguish the originators) and leaving all consumers to the tender mercies of a monopolists.

You should be ashamed - and all so that George Bush can have some contributions from Redmond. I'm disgusted.

--Cliff Allen
